RIM MAZGOUT

Digital Transformation & Artificial Intelligence Engineering Student

Al Hoceima, Morocco | (+212) 682 036 642 | rimmazgout204@gmail.com | LinkedIn: Rim Mazgout

PROFILE

Fifth-year engineering student specializing in Digital Transformation and Artificial Intelligence, with hands-on experience in software development, machine learning, data analysis, and intelligent systems. Comfortable building full-stack applications, dashboards, and AI-driven tools. Currently seeking a Final-Year Project (PFE) internship to apply my technical skills to real-world industrial and AI projects while developing my professional experience.

EDUCATION

Digital Transformation & Artificial Intelligence Engineering | National School of Applied Sciences of Al Hoceima
Sep 2024 - Present
Al Hoceima, Morocco

Preparatory Cycle for Engineering Studies | National School of Applied Sciences of Al Hoceima
Sep 2022 - Aug 2024
Al Hoceima, Morocco

Baccalaureate in Physics and Chemistry | Hassan Dakhil Qualifying High School
Sep 2021 - Jul 2022
Guercif, Morocco

EXPERIENCE

Data & Machine Learning Intern | OCP Group
[Jul 2026 - Sep2026], El Jadida, Morocco

Project: Predictive Maintenance of Industrial Equipment using Machine Learning

- Processed and analyzed Yokogawa Exaquantum SCADA sensor data using Python, pandas, and NumPy.
- Implemented Isolation Forest and Local Outlier Factor (LOF) models for unsupervised anomaly detection.
- Applied feature engineering, StandardScaler, and Matplotlib visualization to identify abnormal industrial equipment behavior.

IT Intern | SDL Majal Berkane
[Jul 2025 - Aug 2025], Berkane, Morocco

- Designed and developed a web-based HR module for employee attendance management.
- Built and administered a centralized MySQL database and developed the backend with Laravel.
- Created a responsive front-end using HTML, CSS, and JavaScript.
- Integrated dashboards for HR indicator monitoring and implemented QR code-based attendance tracking.

SELECTED ACADEMIC PROJECTS

Software Engineering Chatbot | Deep Learning Project
Technologies: PaLM, LLaMA, OpenAI Codex
- Developed a domain-focused chatbot to answer software engineering questions and support users with technical tasks.

ATTENDY - Facial Recognition Attendance System | Computer Vision Project
Technologies: Python, TensorFlow, OpenCV, Tkinter, dlib, MySQL
- Developed an attendance tracking application using LBPH and Haar Cascade facial recognition.
- Added chatbot integration, data management features, and CSV export.

Water Level Monitoring System | IoT Cloud Project
Technologies: Python, Flask, Microsoft Azure, JavaScript, Tailwind CSS
- Designed a real-time water level monitoring solution using a serverless cloud architecture.
- Built an interactive dashboard with an automatic alert system.

Intelligent Job Matching Platform | Data & NLP Project
Technologies: Python, Azure, Airflow, SQL, NLP, Power BI
- Developed a platform to collect, clean, and analyze job offers from multiple sources.
- Applied NLP-based skill extraction and built a Power BI dashboard for market insights.

PFE Defense Scheduling Management System | Spring / J2EE Project
Technologies: Spring, J2EE, Java, Excel processing, PDF generation
- Built an application to automate the scheduling of final-year project defense sessions.
- Implemented Excel imports, scheduling constraints, fair allocation logic, and automatic Excel/PDF outputs.

SKILLS

Programming: Java, Python, JavaScript, SQL, Laravel, Java EE, Node.js, HTML, CSS

AI & Data: Machine Learning, Deep Learning, NLP, Big Data, Data Preprocessing, Power BI

Systems & Tools: MySQL, Database Management, Information Systems, Cloud Computing, UML Modeling, Azure

Core Knowledge: Data Structures, Algorithms, Software Engineering, Cybersecurity, IT Project Management

Soft Skills: Problem solving, professional communication, time management, teamwork

LANGUAGES

Arabic: Native | **French:** Professional working proficiency | **English:** Professional working proficiency
